Expert Fastener Solutions

Fasteners for Wind Power

www.exafast.com.au

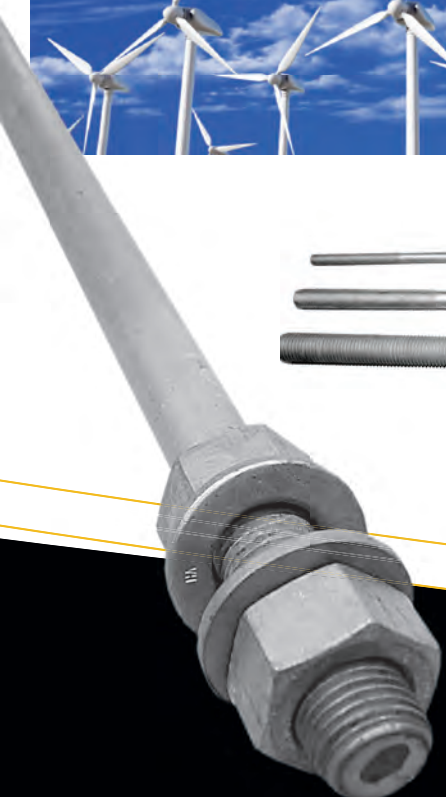

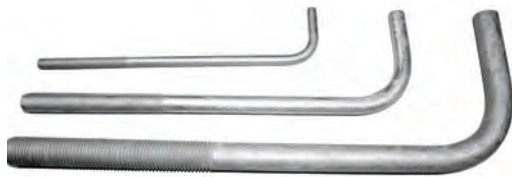

Australian owned and managed, Exafast was established in 1982 and has grown to become Australia's premier wholesaler of industrial fasteners. With a wide range of high quality products, as well as the ability to supply custom designed and made products, Exafast prides itself on providing its customers with prompt, reliable service and expert advice.

Exafast supply a large range of mild steel and high tensile nuts and bolts as well as Genuine Nyloc® brand nylon insert lock nuts, washers including Supa Washers, and made to order fasteners including foundation bolts and studs, nuts and "U" bolts for specialty applications in

the alternative energy, mining, earthmoving, automotive and construction industries.

The NATA accredited in-house mechanical testing laboratory at Exafast has the capability to test all critical mechanical properties to ensure Exafast fasteners exceed all relevant standards and specifications. These tests include proof load and tensile strength tests, determination of hardness and cross sectional microscopic analysis.

At Exafast we provide "Expert Fastener Solutions" as we continually strive to exceed our customer's expectations for product range, quality, service and delivery.

Fasteners for Wind Power – Made to Order

Exafast can supply Made to Order products in a variety of Grades, Materials and Coatings manufactured to specifications provided by the customer for individual project requirements. Cold formed and hot forged fasteners and

components can be manufactured. Note that all products can be supplied with NATA test certificates as required. Exafast can also assist with fastener design and specification.

Types	Property Class/Grade	Sizes	Standards	Coatings
Foundation Studs Foundation Bolts Holdown Bolts	4.6 4.8 8.8 10.9	M5 to M100 Lengths to 3m+	AS 4291.1 ISO 898-1	Blackened & Oiled Zinc Plated Hot-Dip Galvanised PTFE, Xylan Bituminous Coatings Other Specialty Finishes
Structural Bolts Hex Bolts Cup Head Bolts	4.6 8.8 10.9		AS1252 DIN 6914/EN 14399-4 AS 1110/1111 ISO 4014/4015/4017
